

MXA ARCHITECTURE
FIRM PROFILE

FIRM PROFILE

- ARCHITECTURE
- PLANNING AND URBAN DESIGN
- INTERIOR DESIGN
- VISUALIZATION AND ANIMATION
- BIM SOLUTIONS

MXA ARCHITECTURE was established in September 2022 by Brett Moses, AJ Allshouse, and Mark McGlaughlin, three highly experienced professionals in the field of architecture. With a combined 80+ years of experience, our principles have cultivated a wide array of experience.

MXA stands out due to its distinctive organizational structure, setting it apart as a unique architecture firm. Each project undertaken receives the dedicated attention of a comprehensive team-based approach, ensuring meticulous quality control from the initial design phase through project completion and occupancy. The firm's commitment to fostering strong relationships with project owners and stakeholders is evident through a collaborative ethos, addressing potential issues proactively and seeking solutions that enhance the overall success of the project.

FIRM PHILOSOPHY

MXA's primary objective is to foster a dynamic and thriving culture that consistently pursues cutting-edge design solutions, rooted in positivity and productivity. We are dedicated to shaping a collaborative planning and design process through thorough investigation, ensuring the creation of projects that not only meet but surpass specific needs and concerns.

Central to our success is the continual refinement and enhancement of this process. Effective communication stands as the cornerstone, permeating every level of the project experience. Recognizing the Owner as an indispensable member of the design team is pivotal, laying the foundation for our process's triumph.

In addition, we are committed to nurturing a documentation process that reflects our dedication to effective communication. This commitment ensures the success of each project, reinforcing our reputation for delivering quality service. Our aim is to establish and uphold a sterling reputation, fostering repeat business and earning referrals through consistently exceptional results.

MXA offers a comprehensive suite of Architectural Services, drawing upon 80+ years of experience in the Ohio Region. Our unwavering commitment is to deliver high-quality designs that culminate in projects completed on time and within budgetary constraints. From standard Architectural Services to comprehensive Programming through Construction Administration, we provide a range of offerings. Additionally, our portfolio extends to encompass Interior Design, Feasibility Studies, and thorough Code/Life Safety Analysis.

An integral part of our operational policy is the engagement of consulting Engineers whose commitment to excellence aligns seamlessly with our own. Collaborating with the most qualified engineers ensures that we can deliver optimal solutions to any challenges presented, maintaining the highest standards throughout the entirety of our projects.

HOW WE WORK

PROCESS

Our meticulous and innovative approach to every project is all-encompassing, ensuring that we leave no stone unturned in delivering excellence. This approach spans all phases, from the initial conceptual design to the meticulous construction detailing, and even extends to the implementation of sustainable strategies, all of which are key components of our commitment to delivering exceptional results.

EXPERIENCE

MXA possesses a wealth of experience across a wide range of project types. Their expertise encompasses education, industrial, hospitality, residential (single and multifamily), police and fire facilities, as well as master planning for mixed-use projects and municipalities. They have also undertaken master planning for large residential developments. Over the past decade, their primary focus has been on mixed-use and multifamily projects, many of which have been financed through Low Income Housing Tax Credits (both 4% and 9%) as well as State and Federal Historic Tax Credits.

MXA recognizes the significance of providing new affordable housing solutions to address the growing housing deficits.

DESIGN

Superior design is a point of pride for MXA, even when faced with the challenge of creating affordable housing. They see affordability as an opportunity for innovation and believe that every project deserves careful craftsmanship to create the best possible living environment for its residents. MXA is dedicated to delivering exceptional architectural design while meeting the specific needs and aspirations of their clients and the communities they serve.

SOLUTIONS

MXA is dedicated to providing creative solutions for even the most intricate development challenges. We pride ourselves on our problem-solving approach, which revolves around the art of turning potential liabilities into valuable assets. This philosophy underscores our commitment to continually enhance the quality and success of every project we undertake, creating a positive impact that extends beyond the initial scope.

Brett Moses, AIA, LEED AP

Partner

EDUCATION

Kent State University

- Bachelor of Architecture
- Bachelor of Science in Architecture

REGISTRATION, CERTIFICATES, MEMBERSHIPS

- Registered Architect, State of Ohio
- Registration Number: 0513829
- American Institute of Architects
- LEED Accredited Professional
- United States Green Building Council

Experience in multiple disciplines, combined with training in the Fine Arts, has equipped Brett with a unique set of skills for creative problem solving, effective skills, and a distinctive design approach. He also brings a diverse project experience, including research and development laboratories for the polymer and tire industries, medical suites, corporate headquarters, municipal, schools (k-12 and post-secondary), university master planning, hospitality, and single and multi-family residential. This mix of skills and work experience aids in the successful design and implementation of mixed-use projects and the ability to understand the diverse needs and desires of each tenant, visitor, customer and stakeholder involved.
